Re: Dr. Arvin S. Glicksman
Perry/Sterling Project on
Occupational Exposures

Gentlemen:

Dr. Arvin S. Glicksman of Rhode Island Hospital and Brown University, a co-investigator on the Perry/Sterling Project, has requested supplemental funding for an expansion of his current work on this study. The amount requested is \$19,600.00.

Presently, Dr. Glicksman has over 1,000 completed occupational history questionnaires from patients seen at the oncology, respiratory and cardiology clinics at Rhode Island Hospital. He would like to add 1500 patients to his data base, including cases of cancers of the genitourinary system, pancreas and liver, because many of these cancers have been associated with occupational exposures regardless of smoking histories. Since the occupational history questionnaire has already been developed and is in use, the additional funding would be only for salary support for a nurse interviewer (\$18,500), travel (\$500) and supplies (\$600).

Dr. Sommers of CTR has reviewed this request and favors continued support. I also recommend that this supplemental funding be approved.

Sincerely,

Bernie O'Neill
